

Your trusted partner for reliable environmental equipment rentals.

All In-Situ water level, quality and flow instruments are available to rent from our In-Situ Rentals department. We keep a large inventory of our loggers, sondes and sensors professionally maintained and factory calibrated, and we ship directly from our service center in Fort Collins, Colorado.

In addition to our In-Situ Rental services, our Ajax Rentals division offers a complete inventory of environmental equipment, including air, soil and NDT sampling instrumentation, safety equipment and more. Ajax Rentals has four locations in Houston, Dallas, Austin, and Tampa, and provides nationwide rentals and repairs.

Rent from the experts

From the safety of your teams to the integrity of your data, your success is our priority. Whether you're navigating a tight timeline or assessing which equipment best suits your project, our rental teams are here to make the process smooth and stress-free, with expert guidance in equipment selection, training and installation support.

Total project support

Our rental experts do more than supply dependable environmental monitoring and safety equipment—we support your project every step of the way. Our friendly, knowledgeable teams are here to help you meet deadlines, make the most of your resources and tackle field challenges with confidence. From equipment selection to application assistance, we offer complete support tailored to the demands of your projects.

Get what you need

Our rental services provide a convenient, cost-effective alternative to purchasing. With flexible scheduling options for long-term rentals for low-flow sampling or other extended deployments, we have rental offerings to fit the timeline and scale of any project.

Rentals Simplified

Our rental process is fast, flexible and hassle-free. Here's how it works.

1. Contact us.

Contact sales@in-situ.com, call 800-4INSITU or visit our website.

2. Confirm your order.

We'll send you a confirmation email with our rental agreement. Sign and return, and your order is on its way.

3. Receive your items.

Get items delivered or pick up your order at one of our warehouses. Return shipping labels are always included.

Ajax Rentals: Powered by In-Situ

In addition to factory-direct In-Situ water monitoring solutions, our Ajax rental services offer an extensive inventory of air, soil and gas monitoring and safety equipment so you can meet all your monitoring needs in one rental order. Ajax keeps your projects running on schedule, with convenient locations in Texas and Florida, and a commitment to fast, responsive service, with shipping available anywhere in the U.S.
